## Professional Summary

Cloud & DevOps Engineer with 15+ years of IT experience, including 9+ years in cloud and platform engineering across Azure, AWS, and hybrid environments. Experienced in building and operating secure, scalable cloud platforms with focus on automation, CI/CD, Infrastructure as Code, and observability. Hands-on background in Terraform, Kubernetes, Azure DevOps, GitHub Actions, AWS services, and monitoring tooling, with a track record of improving reliability, operational efficiency, and platform consistency. Strong at working with engineering and business stakeholders to translate requirements into practical cloud solutions that support delivery and day-to-day operations.

## Core Skills

- **Platform Engineering**: GitHub Actions, self-service infrastructure, Kubernetes, Docker
- **Cloud Platforms & Architecture**: Azure, AWS, hybrid environments, landing zones, governance, subscription design, scalable cloud platforms
- **Infrastructure as Code and Delivery**: Terraform, ARM templates, Azure DevOps, Jenkins
- **Identity, Security & Compliance**: Entra ID, IAM, RBAC, Azure Policy, policy guardrails, compliance controls
- **Cost & Governance:** cost optimization templates, governance controls, policy-driven infrastructure
- **Scripting & Tooling:** Python, Bash, PowerShell, Ansible
- **Cloud Operations & Observability**: Amazon CloudWatch, Azure Monitor, KQL, Grafana, ELK
- **Stakeholder Collaboration**: requirement analysis, platform standardization, cross-team alignment

## Professional Experience

### DevOps Engineer – AFRY Digital Solutions AB *(May 2025 – Present)*

- Designed and deployed a **GitOps-based Kubernetes platform** using **ArgoCD, Prometheus, Grafana**, enabling version-controlled, automated infrastructure provisioning.
- Maintained the GitOps platform as a live project (GitHub repository).
- Built **RPA workflows in Power Automate** to automate data collection from **Tendsign**, supporting business process optimization.

#### Assignment: Ericsson AB

- Support and maintain radio communication test infrastructure across **hardware, servers, and end-to-end CI pipelines**, improving reliability and continuity in smoke and regression testing workflows.

### **Cloud Engineer – Stena Metall AB** *(Aug 2024 – Jan 2025)*

- Contributed to the evolution of the **Azure Cloud Adoption Framework (CAF)** and landing zone setup, helping define governance, compliance, and platform guardrails for enterprise Azure usage.
- Implemented **Terraform and Azure Pipelines**-based infrastructure patterns aligned with **Azure governance** standards, enabling more consistent and controlled platform provisioning.
- Defined and implemented **Azure Policy guardrails, Entra ID and RBAC** access controls, and secure-by-design infrastructure patterns to improve platform security, compliance, and operational consistency across Azure environments.
- Improved reliability with **KQL-based monitoring**, reducing downtime by **20%**.
- Contributed to secure and reusable Azure platform patterns that supported event-driven integrations, automated workflows, and improved operational visibility.
- Developed reusable **Azure cost optimization templates** (sanitized) for standardized cost-saving practices (GitHub repository).
- Published a **Terraform module library** (sanitized) for consistent Azure infrastructure deployment (GitHub repository).

### **Senior Software Engineer (DevOps) – Capgemini Sverige AB** *(Sep 2021 – Jul 2024)*

#### **Assignment: Volvo Cars Car Safety R&D**

- Implemented **CI/CD pipeline automation** in **Azure DevOps**, reducing deployment times by **30%**.
- Automated **Azure Databricks cluster scaling** with **Terraform** and **GitHub Actions**, improving efficiency in data workflows.
- Upgraded on-prem hardware for **Kubeflow** workloads, integrating with Kubernetes (Rancher RKE).
- Worked across engineering and stakeholder groups to align requirements, shape technical approaches, and support delivery decisions for internal platform initiatives.
- Enabled development teams through platform automation, CI/CD improvements, and reusable infrastructure patterns that simplified delivery workflows and improved operational consistency.
- Configured secure programmatic access to AWS resources using IAM roles and policies, improving access governance and operational efficiency.
- Assessed **Amazon EBS and S3** for workload fit, storage performance, and data access patterns in support of ML platform evaluation.
- Led the **AI-powered Resume Builder Agent** project (sanitized version GitHub repository).
- Maintained a **DevOps Python automation toolkit** for infrastructure tasks (GitHub repository).

### **Senior Business Consultant (DevOps) – Tech Mahindra** *(Feb 2017 – Sep 2021)*

#### **Assignment: Deutsche Telekom**

- Designed and managed **CI/CD pipelines** using **Jenkins** and **Azure DevOps** for hybrid cloud applications.
- Automated **microservice orchestration** with **Docker** and **Kubernetes**, improving resource utilization by **25%**.
- Managed the **ELK Stack** for centralized logging and data indexing.
- Reduced operational overhead by **20%** via **Terraform** and **Ansible**-based infrastructure automation.
- Published a **sanitized OpenStack DevOps solution** (sanitized) showcasing provisioning, monitoring, and automation (GitHub repository).

**Assignment: Cisco Systems**

- Supported AWS-hosted networking and firmware platforms across Development, Staging, and Production environments, contributing to reliable and scalable application operations.
- Designed and implemented AWS-based CI/CD workflows using **EC2**, Jenkins, Maven, Git, SonarQube, and an in-house orchestration tool to improve delivery automation and platform consistency.
- Built and operated containerized microservices with Docker and **Amazon ECS**, contributing to scalable distributed application deployment patterns.
- Strengthened platform observability through **Amazon CloudWatch**, ELK Stack, and Graylog, improving operational visibility and issue resolution.
- Supported distributed application patterns and automated delivery workflows, improving scalability, resilience, and operational continuity across environments.
- Mentored team members and shared technical guidance to improve delivery practices and team capability.

### Senior AEM Administrator (Cloud) – ICF Next *(Sep 2015 – Jan 2017)*

**Assignment: Channel 7**

- Managed AWS and VMware environments, improving uptime by **15%** through optimized resource utilization and automated operations with **Ansible** and shell scripting.
- Designed and maintained a production-like AWS sandbox environment for Channel 7, improving reliability of testing, validation, and release preparation.
- Provisioned and optimized AWS infrastructure using **VPCs, security groups, and EC2**, supporting scalable and secure AEM application environments.
- Improved platform security and operability through SSL configuration, infrastructure governance, and access management using AWS security best practices.
- Supported AEM author/publish environments and Apache Dispatcher integration to improve content delivery and platform stability.

### Unix/Linux Systems Administrator – Hewlett Packard Enterprise *(Nov 2011 – Aug 2015)*

- Administered Unix-based and VMware platforms, enhancing system performance and reliability.
- Authored **SOPs and UML diagrams**, reducing incident response times by **20%**.

## Education

- **B.Tech in Computer Science** – West Bengal University of Technology, Kolkata, India (2005 – 2009)

## Certifications

- **Microsoft Certified: Azure Fundamentals** (Issued March 2023)
  Credential ID: 801D970BAA49297

## Languages

- English: Bilingual / Native Proficiency
- Swedish: SFI C Level Proficiency
