Summary

- An accomplished professional with more than **10** years of proven experience as a DevOps/CloudOps/Systems Engineer in the Information Technology industry.
- Demonstrated knowledge in providing solutions based on application requirements on public/hybrid cloud platforms, implementing the same solutions using several **DevOps** tools and ensuring a smoother agile transformation.
- Excels at spearheading the Continuous Integration/Continuous Development pipelines for business applications using various **DevOps** tools.
- In conjuncture to the above points, my expertise also is in containerizing microservices of our client-facing applications using **Docker** and orchestrating and deploying containers to Development/Stage/Production environments using **Kubernetes** (Rancher).

Skills/Technologies that I work with:

Linux, Shell Scripting (bash), Azure DevOps, **Jenkins**, **Nexus**, **Gitlab**, ELK stack, Kafka, **Docker**, **Kubernetes**, Database management (Mysql/MongoDB).

Experience

Senior Business Consultant (DevOps) – 'Tech Mahindra' : Feb 2017 → Current

- Performing a wide range of activities such as providing solutions and implementing CI/CD pipeline for business applications hosted on **public/Hybrid** cloud platform, orchestrating Microservices using **Docker**, **Kubernetes(Rancher)** and also by implementing **GitFlow**.
- Key role involvement in working with **Hybrid** cloud computing platform using different components and services.
- Working with **Azure DevOps**, **Jenkins**, **Gitlab**(as per requirements) and performing Continuous Integration/Continuous Development.
- Responsible for Log search, indexing and management using tools like Elasticsearch, Logstash, Kibana.
- Automating the regular activities, writing Shell (bash) scripts and resolving the escalated issues.
- Accountable for preparing operational documentations, deployments SOPs and architectural diagrams.

Lead Cloud Systems Engineer – 'ICF Next' : Sep 2015 → Jan 2017

- Managed public cloud-based Infrastructure(AWS) which hosted Production/Stage/UAT environments of the several clients' web contents by using Ansible/Shell script and also by performing various AEM Administration essential tasks as well.
- Implemented Disaster Recovery both at application and infrastructure level.

Unix/Linux Systems Administrator – 'Hewlett Packard Enterprise' : Nov 2011 → Aug 2015

- Managed Unix-based Cloud/on-premise(VMware) platforms in Systems & Storage environment for a leading American Transportation and Logistics. Prepared deployments SOPs and UML-based architectural diagrams occasionally as per demand.

Linux Systems Engineer – 'Axon Networks' : May 2011 → Oct 2011

- Worked in platform administration in Systems & Storage environment for a leading Indian Online Retail client. Accountable for installation, configuration, upgrade, downgrade, troubleshooting, performance tuning and administration of various Linux based servers.

Jr. System Administrator – 'Bobcares' : Nov 2009 → June 2010

- Managed Linux VPSs and implemented DNS, DHCP, SMTP servers as per requirement. Performed troubleshooting for RAID/LVM issues.

Education

B. Tech in Computer Science – West Bengal University of Technology 2005 → 2009
