Professional Summary

Senior DevOps Engineer with 9+ years of hands-on DevOps experience and 15+ years in IT, building, supporting, and improving CI/CD, Linux-based platform, and hybrid infrastructure environments across **AWS**, **Azure**, and private cloud platforms. Strong experience with **Jenkins**, **Kubernetes**, **Python**, **Bash**, **Terraform**, **Ansible**, **Git**, and container platforms for pipeline engineering, infrastructure automation, troubleshooting, and operational reliability in engineering-driven environments.

Worked with cross-functional teams in **automotive and telecom** environments, including assignments with **Ericsson** and **Volvo Cars**, supporting CI workflows, build and integration activities, platform operations, and day-to-day delivery continuity. Experienced in improving internal engineering platforms that support development and test workflows, troubleshooting across infrastructure, networking-adjacent platform issues, and application layers, and strengthening observability with **Prometheus**, **Grafana**, and logging platforms to improve reliability at scale.

Core Skills

- **CI/CD & SCM:** Jenkins, GitLab CI/CD, Azure DevOps, GitHub Actions, Git, Gerrit
- **Linux, Scripting & Automation:** Linux operations, Python, Bash, PowerShell
- **Containers & Orchestration:** Kubernetes (self-managed, Rancher, K3s), Docker, microservices platforms
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack, App Insights, KQL, Amazon CloudWatch, alerting
- **Infrastructure as Code (IaC):** Terraform, Ansible, ARM templates, GitOps (ArgoCD), configuration automation
- **Cloud & Hybrid Platforms:** AWS, Azure, OpenStack, hybrid infrastructure
- **AWS & Azure Services:** EC2, S3, EBS, IAM, Azure Monitor, Entra ID, RBAC
- **Delivery & Support Operations:** solution deployment, incident response, technical documentation, end-to-end troubleshooting, platform support, internal development platform support
- **Ways of Working:** Agile/SAFe, Scrum, Kanban, documentation, cross-team collaboration, stakeholder coordination

Professional Experience

DevOps Engineer – AFRY Digital Solutions AB *(May 2025 – Present)*

- Designed and deployed a **GitOps-based single-node deployment platform** with ArgoCD, **K3s**, Prometheus, Grafana, sealed-secrets, and cert-manager to support automated, repeatable platform delivery and stronger pipeline observability.

- Improved a **self-managed Kubernetes** delivery platform by strengthening deployment consistency, observability, and infrastructure automation for more reliable day-to-day operations in a developer-facing environment.
- Maintained the GitOps platform as a live demo project to showcase cloud-native delivery patterns (GitHub repository).

Assignment: Ericsson AB

- Support and maintain radio communication **test infrastructure** across hardware, Linux servers, **Gerrit** workflows, and **Jenkins-based CI pipelines** in an engineering environment with multiple stakeholders.
- Troubleshoot build, environment, and integration issues to improve the reliability and continuity of **smoke and regression testing** workflows and reduce CI disruption.
- Automate operational and support tasks with **Python**, **Bash**, and **PowerShell** to reduce manual effort and improve response time in engineering-focused environments.
- Partner with development and test teams to stabilize CI workflows, resolve operational issues, and improve day-to-day delivery efficiency in Linux-based internal engineering environments.

Cloud Engineer – Stena Metall AB *(Aug 2024 – Jan 2025)*

- Strengthened **Azure platform security** by implementing **RBAC**, **Entra ID policies**, **Azure Key Vault**, and role-based access controls.
- Automated infrastructure provisioning with **Terraform** and **Azure Pipelines**, reducing manual work by **40%** and improving delivery consistency.
- Developed reusable Terraform modules to standardize infrastructure delivery and support repeatable provisioning (GitHub repo).
- Improved operational visibility and incident response with **Azure Monitor**, **App Insights**, and **KQL**.
- Supported Azure governance and platform standardization through adoption of **Cloud Adoption Framework (CAF)** practices.

Senior Software Engineer (DevOps) – Capgemini Sverige AB *(Sep 2021 – Jul 2024)*

Assignment: Volvo Cars Car Safety R&D

- Designed and optimized **CI/CD pipelines in Azure DevOps** for automotive engineering workflows, reducing release cycle times by **30%** and improving pipeline reliability.
- Automated infrastructure and deployment workflows using **Terraform** and **GitHub Actions**, improving repeatability, delivery speed, and operational consistency.
- Supported scalable **self-managed Kubernetes** and **Rancher** platform environments used by engineering and data-intensive workloads, helping improve platform stability and troubleshooting across delivery workflows.
- Collaborated with cross-functional teams in an **Agile** setup to improve delivery flow, platform reliability, and operational efficiency across internal engineering stakeholders.
- Maintained a **DevOps automation toolkit in Python** (GitHub repository).

Senior Business Consultant (DevOps) – Tech Mahindra *(Feb 2017 – Sep 2021)*

Assignment: Deutsche Telekom

- Delivered hybrid cloud automation using **OpenStack**, supporting scalable infrastructure provisioning and operational consistency across distributed environments.
- Built and managed **Jenkins-based CI/CD pipelines** for microservices running on **Docker** and **Kubernetes**, improving deployment reliability, release efficiency, and day-to-day pipeline support.
- Automated infrastructure and operational workflows using **Terraform** and **Ansible**, reducing manual effort and improving repeatability across cloud environments.
- Supported identity and access management workflows using **Keycloak**, helping standardize authentication and access control across distributed application environments.
- Strengthened observability with the **ELK stack**, improving operational visibility, troubleshooting efficiency, and day-to-day platform reliability.
- Supported Linux-based hybrid environments and containerized workloads, contributing to platform stability and day-to-day operational continuity for shared engineering and service platforms.
- Published a sanitized **OpenStack DevOps toolkit** for internal use (GitHub link).

Assignment: Chartered Accountants ANZ (CA ANZ)

- Implemented a **GitFlow** branching strategy for legacy Salesforce applications, modernizing source control practices and improving release structure for development teams.
- Configured **GitLab Runner** and built **GitLab CI/CD** workflows integrated with **Salesforce DX**, while establishing merge request and code review practices to improve deployment reliability and code quality.

Assignment: Cisco Systems

- Supported AWS-hosted networking and firmware platforms across Development, Staging, and Production environments, helping maintain reliable and scalable application operations.
- Designed and implemented AWS-based CI/CD workflows using **EC2**, **Jenkins**, Maven, Git, SonarQube, and in-house orchestration tooling, improving delivery automation and release consistency.
- Built and operated containerized microservices with **Docker** and **Amazon ECS**, supporting scalable distributed application deployment patterns.
- Strengthened observability with **Amazon CloudWatch**, **ELK Stack**, and Graylog, improving monitoring coverage, troubleshooting efficiency, and issue resolution.
- Supported distributed application delivery and shared technical guidance with team members, improving operational continuity, engineering consistency, and day-to-day DevOps practices.

Senior AEM Administrator (Cloud) – ICF Next *(Sep 2015 – Jan 2017)*

- Administered AWS and VMware platforms, increasing uptime by **15%**.
- Automated repetitive tasks with Ansible and shell scripting in Linux-based operational environments.

Unix/Linux Systems Administrator – Hewlett Packard Enterprise *(Nov 2011 – Aug 2015)*

- Managed large-scale **Linux and VMware environments**, improving performance and reliability.
- Authored SOPs and runbooks, reducing incident response time by **20%**.

Linux Systems Engineer – Trianz (Axon Networks) *(May 2011 – Oct 2011)*

- Installed and optimized **100+ Linux servers**, ensuring uptime and scalability.

Jr. System Administrator – Poornam Info Vision (Bobcares) *(Nov 2009 – Jun 2010)*

- Maintained **Linux VPS environments**, providing high availability and troubleshooting critical incidents.

Education

- **B.Tech in Computer Science** – West Bengal University of Technology, Kolkata, India (2005 – 2009)

Certifications

- **Microsoft Certified: Azure Fundamentals** (Issued Mar 2023) – Credential ID: 801D970BAA49297

Languages

- English: Bilingual / Native
- Swedish: SFI C Level Proficiency
