Dear Hiring Manager,

I am writing to express my interest in the DevOps Engineer position at your company. I have a Bachelor's degree in Computer Science and more than **13 years** of experience as a DevOps/CloudOps/Systems Engineer.

I am passionate about optimizing and automating the software development lifecycle, using the best practices of **DevOps** and **Cloud computing**. I have extensive experience in working with public Cloud platforms such as AWS, Azure, as well as Linux systems and various DevOps tools such as Docker, Kubernetes, Jenkins, Terraform, and Git (Github, Gitlab).

I am a team player who can also act as an individual contributor and can strategize project portfolio according to deliverable timelines. While acting as a Product Owner, I collaborated closely with the scrum teams and the scrum master to plan and execute sprints, defining DoRs and DoDs, and providing feedback and guidance.

I am a diligent, calm and composed self-learner who is always eager to update the skills and knowledge with latest technologies and trends in the industry. I am also a friendly, optimistic, and witty person who can bring a positive and fun atmosphere to the workplace.

I would love to join your company and contribute to its success and growth. I have also attached my resume for your review and I look forward to hearing from you soon.

Thank you for your consideration and attention.

Sincerely, Arnab Dey
